

Reporting

PURPOSE

Integrity Tool & Mold Inc. is committed to maintaining a safe and healthy workplace. All Team Members have a legal duty under the Occupational Health and Safety Act (OHSA) to report workplace incidents. All accidents, injuries, near misses, and hazardous occurrences **must be reported immediately when they occur** to allow for timely investigation, corrective action, and prevention of recurrence.

POLICY

All workplace incidents, including injuries, near misses, property damage, environmental releases, fires, and explosions, shall be reported, investigated, documented, and reviewed in accordance with this procedure.

The following incident types will be tracked, investigated, and reviewed, including review at Joint Health and Safety Committee (JHSC) meetings where applicable:

- Injury Reports
- Near Misses

Near Miss

A **Near Miss** is an unplanned event that did not result in injury or damage but **had the potential** to cause injury, illness, damage to equipment, property, materials, or the environment under different circumstances. Near Miss Reports must be completed and submitted to the Health and Safety Department for investigation and root cause analysis.

INCIDENT CATEGORIES REQUIRING INVESTIGATION

The following categories of incidents may result in harm to people, equipment, materials, property, or the environment and require investigation:

- **Fatality**
An injury that results in loss of life.
- **Critical Injury**
As defined under Ontario Regulation 834/90.
- **Lost Time Injury**
A work-related injury resulting in a Team Member missing scheduled work with wage loss.
- **Property Damage**
An event where contact between objects results in damage to one or both objects.
- **Occupational Illness**
A condition resulting from workplace exposure to a physical, chemical, or biological agent that impairs health.
- **Environmental Release**
An accidental discharge of a physical, chemical, or biological substance into the workplace and/or surrounding environment.

- **Fire or Explosion**

An event involving unintended combustion or explosion.

COMMUNICATION

Information related to reported incidents, investigations, and corrective actions will be communicated to Team Members through one or more of the following methods:

- Joint Health and Safety Committee meeting minutes
- Safety talks led by Leaders
- Health and Safety bulletin board postings
- Lessons learned or testimonials, where appropriate

The Joint Health and Safety Committee will assist in all areas related to corrective actions and recommendations.

NOTIFICATION REQUIREMENTS

- **Fatalities and Critical Injuries**
 - Ministry of Labour notified immediately
 - Written investigation report submitted within 48 hours
 - **Fire or Explosion involving injury**
 - Ministry of Labour notified immediately
 - **Chemical or Environmental Releases**
 - Ministry of Environment notified immediately
 - **Injury Reports resulting in lost time, medical treatment, or modified work beyond seven (7) days**
 - WSIB Form 7 completed **as soon as possible** after becoming aware of the injury
 - Submitted to WSIB within legislated timelines
-

ROLES AND RESPONSIBILITIES

Leaders

- Ensure injured Team Members receive appropriate medical attention.
 - Secure the incident scene when required.
 - Investigate the incident and complete the investigation within **24 hours**, where practicable.
 - **Notify the Health & Safety Leader as soon as possible.**
 - Contact a JHSC Worker Representative to participate in the investigation.
 - Request assistance from additional Leaders, management, or technical resources as needed.
-

Joint Health and Safety Committee (Worker Representative)

- Participate in investigations upon request.
 - **Must be involved** in investigations of fatalities and critical injuries.
 - Work jointly with the Leader to investigate incidents and complete required documentation.
 - Sign investigation reports where applicable.
 - Submit reports to regulatory authorities where required by legislation.
-

INVESTIGATION RESPONSIBILITIES

Information Collection

- Interview involved Team Members.
- Interview witnesses.
- Interview external experts when applicable (e.g., suppliers, equipment manufacturers).
- Conduct interviews promptly, privately, and document findings.

Scene Assessment

- Observe and assess the incident scene, including equipment, materials, and environmental conditions.
- Use photographs, sketches, or diagrams as required.

Identification of Contributing Factors

Consider factors related to:

- People
- Equipment
- Materials
- Environment
- Processes

Reporting

- Complete the standard injury reporting/near miss report form.
 - Review relevant records, including training, maintenance, layout, procedures, time of day, and experience level.
 - Distribute copies of the investigation report to appropriate parties.
-

CORRECTIVE ACTIONS

- Corrective actions must be tracked via the health and safety corrective actions spreadsheet.
- Actions must address **all contributing factors** identified in the investigation.
- Corrective actions must clearly define:
 - What will be done
 - Why it is required
 - When it will be completed
- Completion of actions must be documented, including who completed them and the completion date.

TRAINING

- Leaders, management, and JHSC members involved in investigations will receive formal incident investigation training.
- Training will occur within the first month of appointment to a Leader role or JHSC position, or as soon as reasonably practicable.

EVALUATION

This procedure will be reviewed **annually**, or sooner if an investigation identifies the need for revision.
